

ENVIFERT 20.20.20 +ME

The NPK WSF range

CHARACTERISTICS : Envifert are microcrystalline water-soluble fertilizers made with raw materials of high quality and purity.

EFFICACY : Envifert products are the result careful research activities. Envifert are very high quality fertilizers suitable for solving every nutritional problem of soil irrigation. The main features of the Envifert range include being suitable for all soil irrigation techniques, containing no impurities, chlorine or sodium, having a low biuret content and a high content of micronutrients in chelated (EDTA) form, being 100% soluble in cold water, lowering the pH of solutions to sub-acid values and having low salinity index.

COMPOSITION : N total 20 - (N nitric 5,8 - N amm. 3,9 - N ureic 10,3)
P₂O₅ total 20
K₂O total 20
%W/W (ME) B 0,02 - Cu*0,003 - Mn*0,07 - Mo 0,03 - Zn*0,05
EDTA chelated

SPECIFICATION: Solubility g/L - 20°C 280-300 PH 3,5-4,5

APPLICATION RATE: Drip Irrigation

TIMING OF APPLICATIONS: Doses are referred to each application.

Fruit Trees, Vegetables & horticrops , Ornamental , nursery , Cereals and industrial crops

Applicative solution 0,5-1,5 kg/1000 lt

Equivalent to 60-80 kg/ha

Apply as many times as needed

WARNING: Do not use **Envifert** in solutions with calcium compounds. The product is stable between -10 °C and +35 °C. Store in a well-ventilated, cool, dry place, away from sources of heat/ignition. Protect from sunlight.
